For information on local air ordinances we’ve developed and used to stop polluters in Pennsylvania, see www.actionpa.org/ordinances/

Further information on continuous emissions monitoring (CEM) capability (one of our favored tactics with local air ordinances), see www.ejnet.org/toxics/cems/

Please contact me for (1) further details about rights to pass local environmental ordinances in your state, (2) to help research some of the states for which we have not yet determined whether there is local authority to pass such laws, or (3) to get assistance fighting local polluters and to connect with our national grassroots networks fighting dirty energy and waste industries.

Preemption and Savings Clauses in Federal Environmental Laws

Savings Clauses (federal laws set floor, but not ceiling)
Clean Air Act 42 U.S.C. § 7416
Clean Water Act 33 U.S.C. § 1370

Express Preemption (federal laws set floor and ceiling)
Federal Insecticide, Fungicide, and Rodenticide Act 7 U.S.C. § 136v(b)
Clean Air Act (motor vehicle emissions section) 42 U.S.C. § 7543(a)

Implied Preemption (courts interpret federal laws to set floor and ceiling)

In-between (preempting states in some areas, but not others)
Endangered Species Act 16 U.S.C. § 1535(f)
Surface Mining Control and Reclamation Act 30 U.S.C. § 1254(g)

2 The preemptive effect of the Atomic Energy Act of 1954 and the Hazardous Materials Transportation Act were found to be implied in Jersey Central Power & Light Co. v. Lacey, 772 F.2d 1103 (1985).
Clean Air Act and State/Local Government Authority:

§ 7416. Retention of State authority

Except as otherwise provided in sections 119(c), (e), and (f) (as in effect before the date of the enactment of the Clean Air Act Amendments of 1977), 209, 211(c)(4), and 233 (preempting certain State regulation of moving sources) **nothing in this Act shall preclude or deny the right of any State or political subdivision thereof to adopt or enforce (1) any standard or limitation respecting emissions of air pollutants or (2) any requirement respecting control or abatement of air pollution;** except that if an emission standard or limitation is in effect under an applicable implementation plan or under section 111 or 112, such State or political subdivision may not adopt or enforce any emission standard or limitation which is less stringent than the standard or limitation under such plan or section.

> [T]he congressional finding that state and local governments should have primary responsibility for controlling air pollution (42 U.S.C. § 7401(a)), is not a grant of power to local governments. Local governments are subordinate to the states; any grants of authority must come from the state legislatures, not from Congress. Thus, this Court does not need to examine the federal law for the purposes of this decision, and will concentrate on Rhode Island’s laws and regulations governing air pollution. If the state has preempted East Providence’s Ordinance, its validity cannot be saved by a grant of authority from Congress.

This unfortunate conclusion was reaffirmed in the 6th Circuit in 1993, when they stated that “nowhere does the CAA affirmatively grant local governments the independent power to regulate air pollution.”
